

# Monarflex® Scaffold Sheeting Anchor Strap

Flexible in all directions to relieve stress across the sheeting surface

## INTENDED USE

This unique, patented system is quick to fit and withstands storm force winds. Anchor & Strap has been specially developed for use with Monarflex® Super T Plus scaffold sheeting range.

## INSTALLATION SUMMARY

When passed through the eyelets the Anchor & Strap system effectively locks two sheets together, preventing wind-driven rain penetrating the scaffold installation and guarding against internal debris falling out through gaps in the sheeting.
